The Most Trusted Provider of Business Phone Numbers

Global Call Forwarding offers international phone solutions tailored to support your communication needs. Experience high-quality audio and enterprise-class reliability, and manage your calls from anywhere with our intuitive control panel and softphone apps. Get guidance from our global telecom experts and scale your business phone system.

Compliant Global Coverage

International phone numbers from most major and hard-to-reach countries worldwide.

Centralized Management

An easy-to-use online control panel to manage users, configure advanced features, and call flows.

Responsive Support

24/7 live tech support and dedicated account managers to keep your phone system running smoothly.

Advanced Calling Features

Efficiently manage inbound and outbound calls with 40+ features that work around your needs.

Our Long-Term Clients

Over the past 29+ years, we have developed long-term relationships with thousands of businesses, including:

Scalable and Trusted Communications

- Inbound & outbound voice access in 160+ countries
- Make and receive calls seamlessly over broadband, WiFi, and cellular data
- Flexible integrations: SIP, CRM, helpdesk, UCaaS, BYOC
- Stay connected with our Softphone apps for Windows, macOS, iOS, and Android
- Straightforward pricing with no contracts or commitments

Features for Global Call Management

-  **Local 2-Way Voice**
Make and receive calls with a local in-country caller ID.
-  **Smart Call Routing**
Forward calls to your teams, wherever they are located, with custom routing rules.
-  **Auto Attendant / IVR**
Build custom IVR menus to route calls to the appropriate agent or department.

-  **Call Records & Analytics**
View call history, read transcripts, listen to recordings, and track regional call metrics.
-  **AI Call Insights**
Leverage AI to analyze call traffic and optimize customer interactions.
-  **Integrations**
Connect our voice service with business tools like Zoho, Salesforce, MS Teams, etc.
